1 TO 20 NUMBER POSTERS WITH REAL PHOTOS

WHAT'S INCLUDED?

- 20 number posters with colour sight words
- 20 number posters with black sight words
- Teacher guide

ABOUT THIS RESOURCE

Aim

These posters are designed to help young learners master the numbers 1 to 20 visually, conceptually, and linguistically. The use of real photos makes the learning experience more meaningful and realistic, especially for visually strong learners and children on the autism spectrum.

What concepts and skills are taught?

- Recognition of number symbols
- Knowledge of number words (sight words)
- Counting skills (quantity and one-to-one correspondence)
- Visual and conceptual understanding of quantities
- Vocabulary expansion through identifying objects in the photos
- Support of classroom vocabulary in both language and mathematics

PRODUCT

A3 size depending on your needs.
"Primary colour" option before printing.
Laminated for durability and reuse.
Can be used as activity cards.

PRICE

Full:

Classroom - arrange posters in sequence

For the number word and let learners

Use the objects as a class and show the
